# Corporate Profile

Rich in heritage and synonymous with healthcare, the field of medicine is deeply ingrained in Sanrad's roots as we complete twenty- nine plus years of service to the community. We deliver pre-owned and state-of-the-art diagnostic imaging equipment (CT & MRI) from leading vendors at competitive rates.

Our strength lies in the way Sanrad is structured as a 21st-century, ethical engineering services company.

We nurture and cultivate relationships in the medical community from the grassroots level to understand and therefore deliver on modern imaging equipment requirements to various medical facilities across India.

The Sanrad Group is a 450-million turnover company and has established itself as a market leader in offering import and export services along with stellar sales and support services for authentic, pre-owned diagnostic imaging equipment. With over five - hundred successful installations, ten support offices and hundred employees across the country, Sanrad is committed to paving the way for the next wave of medical revolution in the country.

The background features two thin, light blue diagonal lines. One line starts from the top left and extends towards the center. The other line starts from the bottom right and extends towards the center, creating a subtle geometric pattern.

# Message from the CEO

**Ratishchandran Nair**

CEO

From the outset of Sanrad's creation and looking back over the years in dealing with the medical fraternity, our collective experience pointed to highly advanced diagnostic imaging equipment being available to the general populace in proximity to major metropolitan cities.

Since then, our vision and values have always been to make available state-of-the-art medical imaging solutions and pre-owned products from our preferred partners to diagnostic clinics and medical facilities in smaller towns and cities at an affordable cost and the benefit of the entire community.

The year is 2021, and our journey as a well-recognised and dependable Medical Imaging Equipment company has changed the landscape in not only bringing state-of-the-art technology to the masses but solidified our reputation as an ethical company that builds absolute trust with its customers.

As we look to the future, we will continue to work closely with a cross-section of reputable brands from various industry verticals and leaders in their respective domain to proudly share in the success and equity in the marketplace. With dedicated and competent people at the helm, our clients can be assured of timely, friendly and helpful service at every touch-point from sales to function, always.

# Our Values

---

An eternal promise of integrity in every business relationship we cultivate, quality in every service we deliver and dedicated to furthering our knowledge in every step we take.

*TRUST*

*INTEGRITY*

*RESPECT*

*TEAMWORK*

*QUALITY*

*KNOWLEDGE*

## Our Mission

Enabling medical practitioners to access superior, trusted diagnostic imaging equipment for the betterment of the community.

## Our Vision

To be an integral part of the nation's healthcare ecosystem and a one-stop destination for cutting-edge medical imaging solutions and pre-owned diagnostic equipment with best-in-class customer support.

# Our Cherished Milestones

Sanrad may be a young company in relative parlance but our achievements over the last few decades speak for us. The feathers in our cap span from being amongst the first in the installation of various diagnostic imaging equipment from our trusted partners for our clients, indigenously developing a Mobile CT scanner as well as having a satisfied install base in the hundreds across the country.

## 1994

Primary Installation of pre-owned Toshiba TCT-80A CT Equipment

## 1996

First Installation of the Toshiba TCT-300S Imaging Equipment

## 2001

Primary Installation of pre-owned Spiral CT / Helical CT Equipment

## 2003

Installed base of 100 CT Systems

**2005**

Indigenously  
Developed the First  
Mobile CT Scanner

**2007**

Initial Installation of  
the Permanent MRI  
System

**2008**

Crossed an Installed  
Base of 200 CT  
Systems

**2011**

Original Installation  
of the First 16 slice  
MDCT Scanner  
Equipment

**2012**

Crossed 400 CT  
installations

**2016**

ISO 9001:2015  
Certified

**2018**

A First for India:  
Mobile MRI  
Launch

**2021**

Primary Distributor  
of FUJIFILM  
Healthcare Asia  
Pacific Pte. Ltd.

The background is a solid blue color. In the lower right, there is a circular inset showing a person wearing a white protective suit and hood, possibly in a laboratory or medical setting. The person is looking down. There are also some faint, abstract white lines and shapes on the blue background, including a diagonal line in the top left and another in the bottom right.

## COMPUTED TOMOGRAPHY SYSTEM

High Precision Diagnostic Medical Equipment  
Used for Whole Body Diagnosis

Technological inventions and developments have created new possibilities and breakthroughs in medical diagnostics offering considerable clinical benefits in a variety of fields, be it radiology, cardiology, neurology, women's health or osteoarticular systems. Sanrad, very early on recognised the impact of modern medicine more notably in the field of advanced diagnostic techniques through imaging diagnosis.

Modern procedures like Computed Tomography and Magnetic Resonance imaging are currently available for clinical diagnosis from reputed imaging equipment manufacturers offered by Sanrad that provides maximum economic value for your investment.

## MAGNETIC RESONANCE IMAGING (MRI)

Technological inventions and developments have created new possibilities and breakthroughs in medical diagnostics offering considerable clinical benefits in a variety of fields, be it radiology, cardiology, neurology, women's health or osteoarticular systems.

Modern procedures like Computed Tomography and Magnetic Resonance imaging are currently available for clinical diagnosis from reputed imaging equipment manufacturers offered by Sanrad that provides maximum economic value for your investment.

All MRI devices meet the regulatory requirements and is ISO 13485 certified

## FUJIFILM SUPRIA PLUS 32 SLICE

### Lower Dose, Compact Design

Designed to answer in one CT all the demands for various routine applications, compact size, useful results and ease of use without any compromise.

### Prime Features

Compact Footprint

Intelli IP Noise  
Reduction  
Technology

Submillimeter  
Slice Imaging

HiMAR  
(High Quality  
Metal Artifact  
Reduction)

Simple Dose +  
DICOM Structured  
Report

# FUJIFILM SCENARIA CARDIAC CT 128 SLICE

## Next Standard CT to meet Healthcare Needs Today and Tomorrow

Maximise Efficiency with new solutions and powerful CT capabilities that responds to healthcare needs in the medical field.

### Prime Features

Iterative  
Processing  
for Routine  
Examinations

In-Room  
Operation

HiMAR  
(High Quality  
Metal Artifact  
Reduction)

Simple Dose  
+ DICOM  
Structured  
Report

Eco Mode

# FUJIFILM ECHELON 1.5T MRI SCANNER

## The Enlightened Choice for High-Field MRI

Delivering versatile clinical capabilities with clear images and measurements for qualitative and quantitative diagnosis - and at a reasonable cost.

### Prime Features

Precise Imaging  
with High  
Diagnostic Value

Silent Scan

Automatic Slice  
Positioning

Compact Design  
for Installation  
Flexibility

Low Energy  
Consumption

## FUJIFILM SUPRIA TRUE64

### Value with Powerful CT Capabilities

Supria models are designed for outstanding comfort and experience for a more positive patient experience.

### Prime Features

Remarkably  
Compact Design

High End  
Imaging &  
Performance

Smart Dose (XR-  
29) Compliant

Intelli IP Quick  
- Iterative  
Reconstruction

Reduced kV  
Imaging

## TOSHIBA ASTEION SUPER 4-SLICE (CT SCANNER)

### Tilted Helical Scanning

This new addition to Toshiba's multi-slice family combines high-end detector technology and reconstruction algorithms with an easy to use single console interface, providing exceptional image quality for all CT examinations.

Outstanding reconstruction speed and automated MPR generation of true isotropic data extend your diagnostic capabilities and push productivity forward.

### Prime Features

Dosimetric  
Performance

Image Quality

Fast Image  
Reconstruction

## TOSHIBA ACTIVION 16 MULTI-SLICE (CT SCANNER)

### Ready-Set-Go

The Activion 16 offers fast advanced acquisitions through easy operation by just three steps: Ready (select the scan region) – Set (perform scan planning) – Go (start scanning).

Extremely low-dose scanning, combined with a fast scan protocol and Quantum De-noising software, enables crystal clear, high resolution images, further expanding diagnostic capabilities. New volume rendering software also ensures simple 3-D image generation.

### Prime Features

Computed  
Tomography System

High Precision  
Diagnostic Medical  
Equipment

Used for Whole Body  
Diagnosis

## TOSHIBA AQUILION CX 128-SLICE (CT SCANNER)

### Multi Slice CT Technology

Designed for outstanding performance, the new Aquilion CX comes standard with highest performance allowing clinicians to improve their clinical results with fewer resources in less time and patient dose.

The multislice Helical CT system supports whole-body scanning. A host of exclusive, ergonomic features increase patient comfort and operator convenience while making procedures safer and more efficient.

### Prime Features

Double Slice  
Technology

Quantum Detector  
Technology

128 Unique Slices  
Per Rotation

## TOSHIBA AQUILION 64 (CT SCANNER)

### Speed for Diagnosis

The Aquilion 64 lifts the award winning Aquilion multi-slice CT platform to a new benchmark. It is twice as fast as a 32 detector row CT system and comes with workflow-enhancing software that delivers unsurpassed image quality, improved dose management and superior patient care. In a single breath-hold of 6-10 seconds, the Aquilion 64 can capture superior, precise images of the heart to help early detection of heart diseases

### Prime Features

High-speed Scans

High Spatial  
Resolution

Quantum Denoising  
Software (QDS)

## TOSHIBA ALEXION 16 MULTI-SLICE (CT SCANNER)

### Maximum Performance, Minimum Space

Alexion, a new 16-row multi-slice CT scanner from Toshiba incorporates high-end technology in a compact design. It has been developed as the new entry-level multi-slice CT system for customers who need to perform a wide variety of routine clinical examinations. In order to meet the demands of healthcare providers, Alexion has also been designed from the ground up to be easy to use and to provide consistent examinations at low doses.

### Prime Features

Industry's Largest  
Aperture

Five Scan (Fields of  
View)

Slip-Ring  
Technology

## TOSHIBA EXCELART VANTAGE 1.5T (MRI SCANNER)

The 1.5T, Excelart Vantage™ is the perfect high-field MRI system to conduct a wide range of advanced diagnostic imaging applications to aid in the early diagnosis of life-threatening diseases. At the heart of the line's success is Toshiba's patented Pianissimo™ technology, which reduces acoustic noise by almost 90 percent, reducing the most significant cause of patient anxiety and often eliminating the need for anti-anxiety medication or sedation during routine scans.

### Prime Features

Proprietary Acoustic  
Technology

Parallel Imaging  
Technology

Clinical Accuracy

## OPEN MAGNET (MRI ON WHEELS)

Introducing for the first time in India, Sanrad in conjunction with its partners brings to you “Imaging on Wheels”. We continue to invest in both hardware and software developments, both of which can lead to greater economic efficiencies and, ultimately, more clinically valuable testing.

This real-life concept consists of a self contained imaging suite that is delivered directly to a site of choice. We provide an array of services including operations and support personnel to help optimise and deliver on diagnostic imaging services to medical practitioners from all corners of the country.

### Prime Features

0.3 Tesla Permanent  
Magnet

Open Magnet MRI

Mobility
